Priority will be given to IOM3 members. Successful applicants will be notified before 21 June 2017.

Certificate of Attendance [2.5 hrs] for Continuing Professional Development (CPD) will be provided
at the end of the event.

Introduction

The Central – Wan Chai Bypass and Island Eastern Corridor link (CWB) is currently under construction, it forms part of an east-west strategic route along the north shore of Hong Kong Island. The project includes construction of a 4.5 km long dual three-lane trunk road with a 3.7 km long tunnel. Ventilation is an indispensable part for the operation of the tunnel, as it will supply fresh air to

maintain good air quality environment to the commuters inside the tunnel while discharge vitiated air in a controlled manner at predetermined suitable locations of exhaust. The latest ventilation technology for enhancement of the air quality by installing Air Purification System (APS) is to be implemented in the CWB tunnel project. Since the CWB tunnel would be the first road tunnel in Hong Kong to be equipped with an APS, participants of this visit will be able to get a first-hand view of the ongoing construction works, having a better understanding of the construction of tunnel ventilation.

Please be reminded that PPE will not be provided and you will be required to wear your own PPE (including safety helmet, reflective vest and safety shoes) for the visit. Participant without his / her own PPE will not be allowed to enter the site.

Gathering Point: (Gather at 9:15am) at Central Community Liaison Centre

Address: G/F, Man Yiu Street, Central (under footbridge) - Hotline: 2512 6233 (24-hour)
