Speaker : Mr. HO Hin Wa

Director

China Heavy Equipment & Automation (HK) Ltd.

Ho Hin Wa had been gazetted as Boiler Inspector since 1977. He has worked as Commissioning Engineer for World Wide Shipping for 7 years and stationed in Japan for VLCC power plant commissioning with boiler pressure up to 200 bar and 540°C. After that, he joined China Light & Power Ltd., as Charge Engineer for power plant operation in Generation Department upto 212 bar and 540°C for 7 years.

During 1982-1995, he worked in Boiler, Turbine Plant and Pressure Vessel Manufacturing factory in China for pressure vessel design and fabrication as well as plant modification upto 500 bar and vessel upto 400mm thick.

Currently, he acts as Head of Training Section for HK Professional Hoist as Engineering Association, Design and Safety Consultant for Zoomlion Heavy Industry for crane design, Design Consultant for XCMG - Hirschmann for Crane Automation Safe Load Indicator System.

Abstract:

The increasing demand for foundation work requires large number of large capacity high pressure air compressor units. High efficiency hand tools and safety standards are required to gear up with the current requirements for building works. Pneumatic and DC power type hand tools have replaced AC power tools. It is also required to introduce how to register, understand and safe use of the air compressor units to the industry as it becomes more important for daily safety operation.
